

Dear Chairman Powel: I've been an x-m radio subscriber for two years. I have it installed in my car and one of my trucks. It's a great service. News, sports, any kind of music that suits your taste, little or no commercials, I love it. Now, with their new service (at no additional charge) continuous weather and trafic, it really is worth having with this added value. Please see to it that this company is allowed to continue to provide this service. If it's a competitive threat to regular broadcasters, screw them! If they have something better to offer, let's see it. If it's any better, and suits my needs, I'll buy it. But I want the decision to be mine. I'm sure that the market place will make better decisions about this than federal regulators could ever possibly do. NAB's petition 04160 is a loser, and certainly not in my best interest or the interest of other x-m subscribers. Don't forget, we pay for this service, we want what we pay for.

Best regards, Paul Eberst, Freeport, NY
